ABOUT ME

Software Test Engineer with more than 7 years of expertise in diverse domains including Finance, Healthcare, Credit Reporting, and Investment Solutions. Demonstrated proficiency in automation for web and APIs, as well as database and performance testing, leveraging cutting-edge tools to ensure high-quality deliverables.

Experience

Designation: Technology Business Systems Consultant

Company: Wells Fargo India Solution Ltd.

Aug'22-Present

- Played a key role as a part of Core Automation Group which specializes in delivering test automation solutions to the peer teams under our LOB.
- Developed and maintained Qmetry based Automation suite for a Trade Solutions Platform named APL 10, which considerably reduced Regression Manual Testing efforts for every release.
- Contributed to the development of automated regression tests for applications like Pega, Fircosoft, BetaNXT, Oracle OBPM and Payment Tracker tool.

Designation: Quality Assurance Engineer

Company: Dun & Bradstreet (D&B)

Mar'21-Aug'22

- Maintaining and developing Automated Regression tests using Serenity-Cucumber Framework.
- Implemented API testing using REST Assured for functional testing of UI and API products for D&B Data Products.
- Developed Performance tests for API products using JMeter.

Designation: Software Quality and Test Engineer

Company: Parexel International

Nov'18-Mar'21

- Responsible for Manual and Automation testing using in-house Hybrid Framework.
- Participated in Test Design meetings, and Scrum ceremonies.
- Utilized JIRA for bug tracking and test management, increasing issue resolution speed

Designation: Associate Test Engineer

Company: Cigniti Technologies Ltd

Jun'17-Nov'18

- Analyzed, authored, and executed functional scenarios for testing.
- Developed automated test scripts for web applications, minimizing manual testing efforts.
- Using JIRA, defect traceability matrix for bug tracking and effective documentation.
